

OIL FIELD ENGINEERING & QUALITY CONTROL

# BRIDGE COURSE FOR OEQC-QCI

in the Oilfields and related Industries

 **INDUSCAN**<sup>TM</sup>  
**PETROLEUM INSTITUTE**

**AN ISO 9001-2008 INSTITUTION**

**PROFESSIONAL COACHING TOWARDS OIL FIELD & RELATED INDUSTRIES**

**NILAMBUR - KERALA**

## SCOPE

Induscan Petroleum Institute is conducting specialization courses towards Oilfield and related industries over the past 10 years. More than 10000 Mechanical Engg. Diploma Holders have so far been well placed in Indian as well as abroad Oilfield projects through this institution. Since the mechanical engineering background is a must to understand the concept, the admission eligibility for our main course of OEQC Quality Control Inspector is limited to the Mechanical Engineering Diploma Holders.

As we have taken into consideration, the huge volume of demand from the engineering diploma of other disciplines, we are introducing a preparatory course of BRIDGE COURSE FOR OEQC QCI. The Bridge Course is aimed and designed in such way to ensure fine tuning and bridging other discipline candidates to the mechanical engineering background. The candidate successfully completes the Bridge Course will be eligible for taking admission to the OEQC Quality Control Inspector Course at Induscan.

## RELEVANCE

Oilfield Engineering is a vast area where there are wide job opportunities in the field of Planning, Materials, Piping, Welding, Fabrication, Inspection, QAQC etc but being a fresher you might face hurdles in taking up direct responsibilities. By conducting the main course of OEQC QCI we work as a bridge between the curriculum and the career. As this course is specially designed for Mechanical Engineering Diploma Holders, those comes from other branches who wish to join for this course shall first go for the preparatory course of BRIDGE COURSE FOR OEQC QCI which starts 2 weeks before the start date of each main course.

## JOB GUARANTY

It is not necessary to guarantee jobs for the Quality Control Inspector who have successfully completed the course of Oil Field engineering and Quality Control from Induscan Petroleum institute. However according to the institutions policy, we guarantee 10% of students who complete the main course through this Bridge Course.

## EXAMINATION AND CERTIFICATION

Examination will be conducted on both theory and practical after completion of the Bridge Course. Those who gets 80% of marks and above will be eligible for the admission to our main course of Oil Field Engineering and Quality Control, Quality Control Inspector.

## QUALIFICATION FOR ADMISSION

Engineering Diploma in any disciplines other than Mechanical Engineering is the basic requirement for admission to the Bridge Course. Those who are awaiting final semester result or to attend supplementary examinations also shall apply.

## REGISTRATION

Properly filled application form along with a copy of Diploma certificate shall be submitted either in person or through website ([www.induscan.net](http://www.induscan.net)).
